Rimrock Purchases Lubrimation Assets

Rimrock to Supply Full Line of Lubrimation Products and Services

Columbus, OH – Rimrock Corporation today announced that the company has purchased all assets of Lubrimation, which formerly supplied die lubrication and automation equipment to the forging industry.

“As Rimrock continues to grow, we are continuously striving to provide the highest quality and most efficient products and services to our customers,” said Tom DeJong, President and CEO of Rimrock Corporation. “While we have been working with the forging industry to supply innovative products, the Lubrimation line will further our efforts and allow Rimrock to provide new cutting-edge technologies to our customers. I am looking forward to the opportunities this arrangement will bring not only to Rimrock but to the industry as a whole.”

Rimrock will offer a complete line of Lubrimation products including:

- Nozzles;
- Spray Tips;
- Stationary Systems;
- Reciprocators;
- Pick – and – Place Units;
- Proportioners; and,
- Custom Manifolds.

The line of products, formerly known as Lubrimation, has been proven to increase productivity, provide better parts quality, allow for less lubricant consumption, longer die life and less maintenance.

Founded in 1956, Columbus, Ohio-based Rimrock Corporation is a premier supplier of automation equipment for the high-pressure die-casting and foundry, forging industries. Rimrock supplies a wide-range of automation solutions, including ladles, sprayers, extractors and turnkey robotic solutions. Additionally, Rimrock is a strategic partner of ABB Robotics and is North America’s only certified ABB parts and warranty provider.
